

# EfficientNet: Rethinking Model Scaling for Convolutional Neural Networks

Mingxing Tan, Quoc V. Le  
ICML 2019

발표자: 박상수

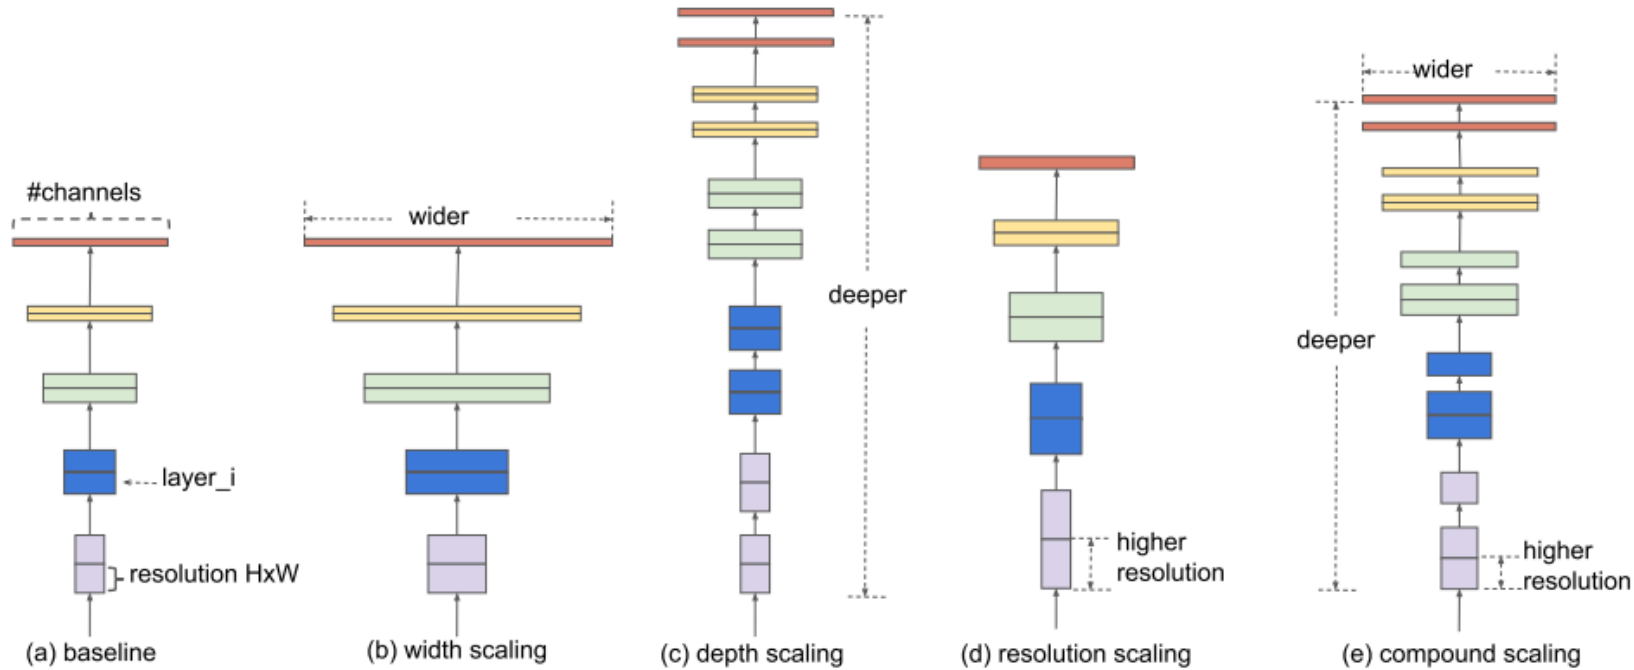

# EfficientNet 결과

- 정확도와 Efficient에서 모두 우수한 성능

# ConvNet의 정확도를 높이기 위해서는 ?

- Size scaling

**Figure 2. Model Scaling.** (a) is a baseline network example; (b)-(d) are conventional scaling that only increases one dimension of network width, depth, or resolution. (e) is our proposed compound scaling method that uniformly scales all three dimensions with a fixed ratio.

# 하나만 Scaling 하는 경우

- Width, Depth scaling은 이른 시점이 Saturation
- Resolution은 키울수록 정확도 향상

*Figure 3. Scaling Up a Baseline Model with Different Network Width ( $w$ ), Depth ( $d$ ), and Resolution ( $r$ ) Coefficients. Bigger networks with larger width, depth, or resolution tend to achieve higher accuracy, but the accuracy gain quickly saturate after reaching 80%, demonstrating the limitation of single dimension scaling. Baseline network is described in Table 1.*

# D, R을 고정하고 W만 Scaling

- 초록색과 노란색: Resolution을 키우는 것이 좋음
- 빨간색: 3가지 Scaling factor을 키우는 것이 성능 향상에 좋음

# Compound scaling

- 모델 (F)를 고정하고 d, w, r을 조절하는 방법을 사용
- MnasNet과 유사한 Search space에서 AutoML을 통해서 얻은 모델
- EfficientNet-B0

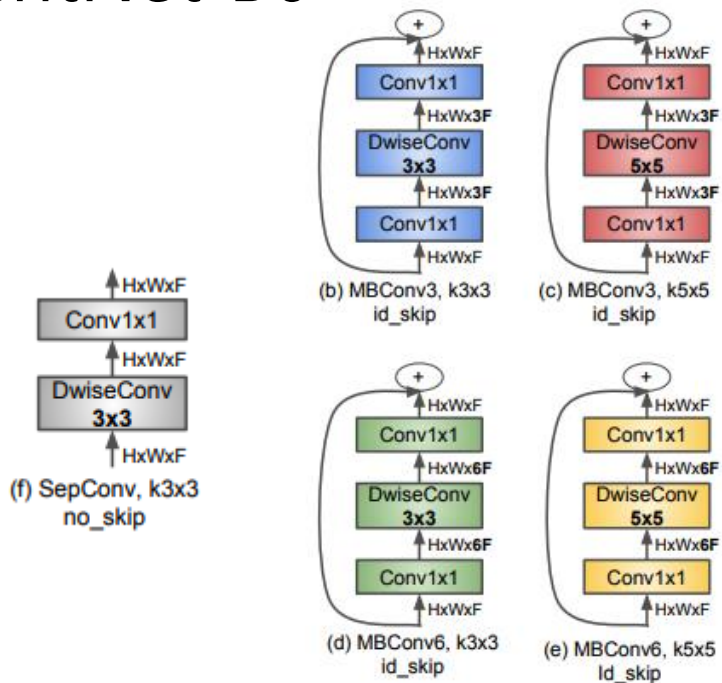

Table 1. **EfficientNet-B0 baseline network** – Each row describes a stage  $i$  with  $\hat{L}_i$  layers, with input resolution  $\langle \hat{H}_i, \hat{W}_i \rangle$  and output channels  $\hat{C}_i$ . Notations are adopted from equation 2.

| Stage<br>$i$ | Operator<br>$\hat{\mathcal{F}}_i$ | Resolution<br>$\hat{H}_i \times \hat{W}_i$ | #Channels<br>$\hat{C}_i$ | #Layers<br>$\hat{L}_i$ |
|--------------|-----------------------------------|--|--------------------------|------------------------|

# 실험 결과

- 기존 ConvNet과 비슷한 정확도, 적은 연산량 및 모델 크기

Table 2. **EfficientNet Performance Results on ImageNet** (Russakovsky et al., 2015). All EfficientNet models are scaled from our baseline EfficientNet-B0 using different compound coefficient  $\phi$  in Equation 3. ConvNets with similar top-1/top-5 accuracy are grouped together for efficiency comparison. Our scaled EfficientNet models consistently reduce parameters and FLOPS by an order of magnitude (up to 8.4x parameter reduction and up to 16x FLOPS reduction) than existing ConvNets.

| Model                                      | Top-1 Acc.   | Top-5 Acc.   | #Params     | Ratio-to-EfficientNet | #FLOPS       | Ratio-to-EfficientNet |
